

Curriculum Vitæ

Vincent Acary

June 11, 2020

Born on 15th May 1973, Laval (Mayenne), France. French Citizen. Married, two children.

Current position & address

INRIA Senior Researcher (Directeur de Recherche DR2)

INRIA (French national research institute for computer sciences and control).

Centre de recherche Grenoble Rhône-Alpes, Equipe-projet TRIPOP

655, avenue de l'Europe. Inovallée de Montbonnot, 38334 Saint Ismier Cedex, France.

vincent.acary@inria.fr

Education

- 2015 **Habilitation à diriger les recherches (HdR)**. Applied Mathematics.
Doctoral school of Mathematics, Information Sciences and Technologies, and
Computer Science. Grenoble University.
- 1997 – 2000 **PhD Thesis**. Mechanics.
Ecole Supérieure de Mécanique de Marseille (ESM2) & Université d'Aix-
Marseille II
- 1997 **Master in Science in Mechanics (D.E.A.)**
ESM2 & Université d'Aix-Marseille II. Mention Bien (Rank 1^{er}/30).
- 1994 – 1997 **Engineering Diploma of ESM2**, (nowadays École Centrale Marseille)

Work Experience

- 2016- **Permanent senior researcher (DR2)** INRIA Rhône-Alpes
- 2014–2016 **Permanent researcher** INRIA Chile, Santiago de Chile
- 2003–2013 **Permanent researcher (CR1)** INRIA Rhône-Alpes
- 2003 **Post-doctoral fellow** INRIA Rhône-Alpes. European project SICONOS.
- 2001 – 2002 **Post-doctoral fellow** Post-doctoral CNRS grant.
Laboratoire d'Automatique de Grenoble (LAG UMR CNRS/UJF/INPG 5528)/Schnei-
der Electric.
- 1997 – 2000 **PhD candidate**. BDI CNRS grant.
Laboratoire de Mécanique et d'Acoustique (LMA, UPR CNRS 7051, Marseille)
& Groupe pour l'Application des Méthodes Scientifiques à l'Architecture et
l'Urbanisme (GAMSAU, UMR CNRS 694, Marseille).

Scientific responsibilities & Grants

- 2018– TRIPOP. Head of the joint research team of Inria Grenoble Rhone-Alpes and of
the Laboratoire Jean Kuntzmann (LJK). <http://tripop.inrialpes.fr/>
- 2011– ENNSD. Co-founder and animator of the European network for nonsmooth dy-
namics. <http://ennsd.gforge.inria.fr/>
- 2018–2022 FUI MODELISCALE <https://team.inria.fr/modeliscale/>
- 2019–2021 DIGIT-SLID. ANR (French National Agency for science) (Générique) project.
<http://digislid.gforge.inria.fr>
- 2011–2015 CHASLIM. ANR (Blanc) project. co-responsible for the work package 5 “Numer-
ical tools and software development.”
- 2008–2012 SALADYN. ANR project COSINUS 2008. Principal investigator.
- 2007–2009 VAL-AMS. ANR project SETIN-2006. Responsible for the work package 3 “Ad-
vanced numerical analysis techniques.”
- 2003–2007 SICONOS. IST2001-37172. FP7 European Project. Responsible for the work pack-
age 2 “Numerical algorithms and software tools”.

Research Activities

Main research themes

Modeling, analysis, simulation and control of nonsmooth dynamical systems:

- Modeling, analysis and simulation of unilateral contact, impacts and Coulomb friction:
Multiple impact law modeling, formulation of problems with unilateral contact and Coulomb friction in second order cone complementarity problems, numerical optimization based methods.
- Time integration schemes for nonsmooth dynamical systems:
Higher order sweeping process, complementarity systems and evolution variational inequalities, higher order time integration scheme for nonsmooth mechanics, time-discontinuous Galerkin methods.
- Modeling, analysis and simulation of switched electrical circuits.
Modeling of ideal electrical components in complementarity form, automatic circuit equation formulation of switched electrical circuit, time integration methods and solving procedure, numerical computations of periodic solutions.
- Time discretization methods for sliding mode control.
Formulation of sliding mode control in terms of complementarity, implicit time discretization strategies free of numerical chattering.
- Simulation methods of gene regulatory networks:
discontinuous differential equations, differential inclusion, Filippov's solution, stability.

Transfert & industrial applications

- Simulation and modeling of electrical power converters (STMicroelectronics and Mentor Graphics & patent on "improved circuit simulator)
- Simulation and design of electrical circuit breakers (more than 10 years of collaboration with Schneider Electric)
- Simulation and design of space robotic systems (ESA ExoMars project. Collaboration with TRASYS/Space Belgium)
- Numerical design and simulation software of multi-body systems (collaboration with ANSYS, France.)

Publications

Complete list of publications available here <http://tripop.inrialpes.fr/people/acary/publications.html>

Books

The nonsmooth contact dynamics method for the simulation of granular matter flows and fracture in mining applications
- 27/08/2015. CMM. Center of Mathematical Modeling. Universidad de Chile. Santiago de Chile. The nonsmooth contact dynamics method for the simulation of granular matter flows and fracture in mining applications
- 12/11/2015. Seminario del Departamento de Ingeniería Matemática. U. de Concepción. Chile
Modeling and simulation of mechanical systems with contact and friction within the nonsmooth contact dynamics framework. Possible applications in geosciences. Seminario del Departamento de Ingeniería Matemática. Universidad de Concepción
- 08/09/2016 Fifth symposium of the European network for nonsmooth dynamics (ENNSD). Université de Liège.
An open question : How to solve efficiently 3D frictional contact problem ?
- 01/06/2017 Sixth symposium of the European network for nonsmooth dynamics (ENNSD). Eindhoven
Improvements of the Moreau–Jean time integration scheme for multi-body systems with clearances and large rotations
- 18/01/2020. SIMAP/LJK/Institut Fourier. Grenoble, France. Materials seminars.
Time-Integration methods for nonsmooth contact dynamics with friction and impacts.

PhD Thesis supervisions

- Doh-Elvis Taha [November 2004 – September 2005; Inria - Schneider Electric grant. Withdrawal after one year. Co-supervisor Bernard Brogliato, amount of supervision involved: 50%] *Title: Modeling of multiple impacts in circuit breakers.* Associated publication with the student: [C18]
- Florent Cadoux [September 2006 – September 2009; “Ecole Polytechnique” grant. PhD thesis of the University Joseph Fourier- Grenoble I, defended on 26/11/2009. (now associate professor, titulaire de la chaire industrielle ERDF “smartgrids” at Fondation Partenariale Grenoble INP). Co-supervisor Claude Lemaréchal, amount of supervision involved: 50%] *Title: Optimization and convex analysis for nonsmooth dynamics.* Associated publications with the student: [A26, CiB5, A27, Co22, Co26, Co25]
- Olivier Huber [September 2011 – May 2015; “Allocataire Normalien” grant. Co-supervisor Bernard Brogliato, amount of supervision involved: 50%. PhD thesis of the University Joseph Fourier- Grenoble I, defended on 05/05/2015.] *Title: Discretization methods for sliding mode control.* Associated publications: [C9, C6, C7, A12, A13, CiB4]
- Mounia Haddouni [May 2012 – May 2015; CIFRE ANSYS grant. Co-supervisor Bernard Brogliato, amount of supervision involved: 80%. PhD thesis of the University Joseph Fourier- Grenoble I, defended on 27/05/2015] *Title: Algorithms for solving the dynamics of contact and friction.* Associated publications: [C10, CN2, ?]
- Narendra Akhakar [December 2012 – April 2016] ; Schneider Electric grant. Co-supervisor Bernard Brogliato, amount of supervision involved : 80%.] *Title: Numerical modeling of mechanisms. Influence of the clearances, the flexibility and the multiple impacts..* Associated publication: [Co9, ?]

- Rami Sayoud [February 2018 –] ; Schneider Electric grant. Co-supervisor Bernard Brogliato, amount of supervision involved : 50%.] *Title: Study of the propagation modes of seismic and vibrations solicitations in electrical switchboard and components.*
- Christelle Kozaily [September 2018 –] INRIA grant. IPL Modeliscale Co-supervisors Benoit Caillaud, Khalil Ghorbal (INRIA Rennes Bretagne Atlantique), amount of supervision involved : 30%.] *Title: Structural analysis of nonsmooth DAE systems*
- Charl lie Bertrand [September 2018 –] ; ITPE grant (Travaux publics de l’ tat, ENTPE). Co-supervisor Claude-Henri Lamarque (LTDS/ENTPE), amount of supervision involved : 50%.] *Title: Modeling, study and control of the dynamical behavior of a translating cable with punctual masses and frictional supports*
- Benoit Viano [September 2019 –] ; INRIA grant. Co-supervisor Franck Bourrier (INRAe), amount of supervision involved : 50%.] *Integration of block interaction with elasto-plastic deformable structures into non-smooth block propagation models.*

Supervision of doctoral internships and post-doctoral fellows

- Mathieu Renouf [post doc Bipop-Siames, October 2004 – September 2005; INRIA grant.] (now CNRS researcher at LMGC Montpellier.) Supervision ratio 100%. Publications: [C19, C15].
The work of Mathieu Renouf concerned the comparison of numerical algorithms for frictional contact problems in a real-time context. This was carried out with the INRIA Project Team, Siames of IRISA where the post-doc spent 6 months.
- Houari Khenous [post-doc September 2006 – September 2007; INRIA grant.] (now research engineer IFPEN Paris). Supervision ratio 100%. Publication: [Co24].
This post-doc concerned the optimization and the implementation in Siconos of semismooth Newton methods for solving frictional contact problems based on Nonlinear Complementarity Problems (NCP) formulations [B3].
- Carmina Georgescu [post-doc Octobre 2009 – Mars 2011 ; INRIA grant.] (now assistant professor University of Bucarest, Romania). Supervision ratio 50%. Publication: [A25]
This joint post doc fellow with Hidde de Jong (INRIA Team project Ibis) concerned the numerical simulation of piecewise-linear models of gene regulatory networks using complementarity systems in Siconos.
- Thorsten Schindler [post-doc Novembre 2010 – Novembre 2011; ANR Saladyn grant.] (now associate professor. Lehrstuhl f r Angewandte Mechanik. Technische Universit t M nchen). Supervision ratio 100%. Publications: [A16, Co14, Co17, Co18, A20].
With Thorsten Schindler, we developed new event-capturing time-stepping schemes for non-smooth mechanical systems based on time discontinuous Galerkin methods.
- Scott Greenhalgh [PhD internship Septembre 2010 – Mai 2011; ANR Saladyn grant.] (former post-doc Yale University and now associate at Queen’s University). Supervision ratio 50%. Publications: [Co16, A21].
With Scott Greenhalgh who was in internship in our team as PhD candidate, we worked in the preservation of dissipation properties for linear complementarity systems when a time-discretization technique is used.
- Valentina Sessa [PhD internship Septembre 2012 – F vrier 2013; ANR Saladyn grant.] (now associate professor at IMPA, Rio de Janeiro, Brazil). Supervision ratio 100%. Publications: [C8, ?]. With Valentina Sessa who was in internship in our team as PhD candidate, we study and develop a numerical algorithm for computing periodic solutions of linear complementarity systems with applications to electrical circuits
- Bin Wang [post-doc Septembre 2012 –Septembre 2013; ANR Chaslim grant.] Supervision ratio 50%. Publications: [C5, A15]. The post doc of Bin Wang concerned the experimental validation of the implicit sliding mode control discretization on a experimental set-up located at IRCCYN (ECN, Nantes).

- Achref El Mansour [Inria granted by STRMTG Grenoble (2018- 2019, V. Acary, B.Brogliato)]. Numerical and analytical methods for translating cables.
- Alexandre Rocca [Inria granted by FUI Modeliscale (Dassault Systems) 2018-2020, V. Acary, B.Brogliato] *Nonsmooth cyberphysical systems*
- Mohammad Rasool Mojallizadeh [Inria, V. Acary, B.Brogliato 2019-2020] *Discrete sliding mode differentiators*

Supervision of research internships

• Christophe Merle [DEA Mécanique/Stage de fin d'étude Ingénieur ESM2 February 2002–September 2002. Grant Schneider Electric] • Rami Ch'kir [DEA Mécanique/Stage de fin d'étude Ingénieur ESM2 February 2003–September 2003.] • Alexandre Ravoux [DESS Génie informatique. January-June 2004; Grant Siconos] • Jean-Michel Barbier [DESS Génie informatique. January-September 2004; Grant Siconos] • Jérémie Blanc-Tranchant [DESS Génie informatique. January-June 2004; Grant Siconos] • Jean-Baptiste Charlety [DESS Génie informatique. January-June 2004; Grant Siconos] • Pascal Denoyelle [Master 2 IMSN. March–August 2005. Grant Siconos] • François Garrigues [ENSIMAG 4A. May– August. 2006 Grant Siconos] • Abdelaziz N'Diaye [ENSIMAG 2A May–July 2006. Grant Siconos] • Tomasz Toczek [ENSERG 2A. May–August 2006.] • Walid Ben Romdhane [Ecole polytechnique de Tunisie. February–August 2008. Grant internship INRIA] • Hakim Majidi [Master 1 MAI Grenoble. April–July 2008] • Sullivan Hamard [ENSE³ Stage de fin d'étude Ingénieur] • Jean-Nicolas Roussel [Ecole Polytechnique 2A. January–July 2015.] • Thomas Lepoutre [Ecole Centrale Marseille. Stage césure. July–December 2015] • Charles-Édouard Ladari [Ecole Centrale Paris. Stage césure. September–December 2015] • Charles-Édouard Ladari [Ecole Centrale Paris. Stage césure. September–December 2015] • Abdulhadi Abdlgwad, Izmir yüksek teknoloji University, Turkey Erasmus Internship (10/2017 – 04/2018, V. Acary, F. Bourrier) • Nicolas Molina Vergara, M1 internship, Pontificia Universidad Católica de Chile, Santiago (01-03/2018, V. Acary) • Thoi Thi Tran, M2 internship, Université de Limoges (03-08/2018, V. Acary) • Maksym Shpakovych, M2 internship, Université de Limoges (02-08/2019, V. Acary, P. Armand) • Nicolas Parent, Joel Andrepont, M1 internship, Université Grenoble Alpes (05-07/2019, V. Acary, F. Pérignon, M. Brémont)

Supervision of non permanent research and development engineers.

• Jean-Michel Barbier [October 2004 – April 2005; Grant Siconos] • Jean-Baptiste Charlety [October 2004 – April 2005; Grant Siconos] (now software quality engineer at EMC). • Pascal Denoyelle [September 2005 – February 2008; Grant Ingénieur spécialiste INRIA] (now R&D engineer Mentor Graphics). • Franck Pérignon [April 2005 – September 2008; Grant Siconos] (now CNRS research engineer). • Olivier Bonnefon [January 2007 – August 2009 ; Grant VAL-AMS; September 2009 – August 2011 Grant Saladyn] (now INRA research engineer). • Laurent Schiavon [January – March 2009 ; Grant Saladyn] (R&D engineer, OPEN Saint Egrève) • Hong Ha Do Nguyen [January – December 2012; Grant Saladyn] (R&D engineer Singapore.) • Jan Michalcsyk [September 2012 – September 2014; Grant ADT INRIA] (now Expert Engineer INRIA.) • Maximiliano Olivares [April 2015 – ; INRIA Chile engineer] (now Expert Engineer INRIA.) • Stephen Sinclair [December 2015 – ; Grant ADT INRIA]

Supervision/Collaboration with permanent research engineers

- Franck Pérignon, IR CNRS. Laboratory LJK. With Franck Pérignon, I work partly on refactoring of the foundation of Siconos since 2008 and the computation of waves propagation and periodic solutions with impact [Co11] since 2013.
- Maurice Brémont, IR INRIA Grenoble. M. Brémont is the main engineer in Siconos in charge of maintenance, support and packaging. He also made great contributions to siconos for the functionalities and the architecture.

PhD thesis Jury

- Hadia Ramal. Université de Limoges, "Problèmes de complémentarité aux valeurs propres : théorie, algorithmes et applications" supervised by Samir Adly. 19/09/2013. Examiner
- Thomas Catterou, Université Aix-Marseille. *Étude numérique et expérimentale du comportement dynamique non linéaire d'un réseau de tubes avec jeux - application aux faisceaux d'aiguilles combustibles* RNR supervised by Bruno Cochelin, Centrale Marseille / LMA. president 22/10/2018,
- Clara Issanchou. Université Pierre et Marie Curie *Vibrations non linéaires de cordes avec contact unilatéral. Application aux instruments de musique.* supervised by Jean-Loïc Le Carrou and Cyril Touzé. Examiner. 25/09/2017
- Loic Dugelas. Université Grenoble Alpes. *Stratégies probabilistes appliquées à la modélisation numérique discrète : le cas des filets pare-pierres* supervised by Franck Bourrier and François Nicot. 10/01/2020. president.
- Javier Galvez. Université de Liège. *Numerical simulation of frictional contact problems in flexible multibody dynamics* supervised by Olivier Brüls. 22/06/2020. Reviewer.

Foreign Jury of Master Thesis

- Matteo Fancello. "A Co-Simulation Approach for Mixed Smooth and Nonsmooth Dynamics in Multibody Problems". Politecnico di Milano, Facoltà di Ingegneria Industriale, Corso di Laurea di Ingegneria Spaziale. Tesi di Laurea. 2012. Reviewer

Colloquia and summer school organizations

- 2005. Siconos/DaVinci conference. INRIA Rhône-Alpes, July 8–9 2005, Grenoble France
- 2005. CEA-INRIA-EDF school¹. *Nonsmooth Dynamical Systems. Analysis, Control, Simulation and Applications.* June 29–02 2006. INRIA Rocquencourt, France.
- 2010. Summer School INRIA². *Nonsmooth Contact Mechanics: Modeling and Simulation* June 14–18 2010 Centre Paul Langevin, Aussois, France
- 2012. EUROMECH Colloquium [516]³. *Nonsmooth contact & impact laws in mechanics.* July 6th - 8th 2011 Grenoble, France
- 2012. Summer School INRIA⁴. *Nonsmooth Contact Mechanics: Modeling and Simulation* September 9–14 2012 Centre Paul Langevin, Aussois, France
- 2014. WCCM-ECCM-ECFD conference⁵. Co-organizer with Mathias Legrand of a mini-symposium entitled Nonsmooth Dynamics and Vibrations. July 20–25 2014, Barcelona, Spain.
- 2014. Workshop BIRS Center⁶. co-organizer with Robert Bridson (University of British Columbia), Danny Kaufman (Adobe Research), Jong-Shi Pang (University of Southern California), and Jeff Trinkle (Rensselaer Polytechnic Institute). *Computational Contact Mechanics: Advances and Frontiers in Modeling Contact (14w5147).* February 16–21 2014. The Banff International Research Station (BIRS) for Mathematical Innovation and Discovery. Banff, Alberta, Canada.

Participation in membership on editorial boards of conference

- [2012–] **Member of the EUROMECH Nonlinear Oscillations Conference Committee** (ENOC Committee⁷)[selection of the location of the conference, organization of the review

process, choice of the plenary lectures, the mini-symposium, the best paper award]. Presently, ENOCs are the largest, high-quality, scientific events in the broad area of nonlinear dynamics not only in Europe but on a worldwide basis. Since 1992, the European Mechanics Society (EUROMECH) organizes European Nonlinear Oscillations Conferences (ENOCs) through the European Nonlinear Oscillations Conference Committee (ENOCC). Actually, these events have a much longer tradition, since they are successors of the former ICNO (International Conference on Nonlinear Oscillations) series held from 1961 to 1990 in East-European countries. Starting from the 1st International Conference on Nonlinear Oscillations in Kiev, 1961, twelve ICNOs were organized till 1990. Then, starting with the 1st European Nonlinear Oscillations Conference in Hamburg, 1992, eight ENOCs were organized till 2014 (Prague, Copenhagen, Moscow, Eindhoven, St. Petersburg, Rome, Vienna).

Scientific animation

- **Co-founder and animator of the European network for nonsmooth dynamics** ⁸

The goals of the European network for nonsmooth dynamics are: to provide a cooperation platform for researchers specialized in nonsmooth dynamics, to promote the research focussed on nonsmooth dynamics and its applications, to improve networking activities (summer school, workshops or conferences), to disseminate the knowledge from the academic community to industry. The network organizes a two-days symposia each year with 8 up to 10 long talks. The network also coordinates proposition of mini-symposia in the main conferences of the domain.

Administrative tasks inside INRIA

- Member of the CTP INRIA (Comité Technique Paritaire (CTP))[2006–2011] and then member of the CTI (Comité Technique INRIA (CTP))[2011–2014]
- Member of the center's committee of INRIA Grenoble [2007-2011]
- Member of the CLFP (Commission Locale Formation Permanente) [2011–2014]

Reviews of projects

- Reviewer for the National Science foundation (NSF, USA), the Netherlands Organisation for Scientific Research (NWO) and the Swiss National Science Foundation (SNSF).
